

Meta Title: AI Presentation Maker: Text to Slides, Fast with Imagine Computer

Meta Description: Imagine Computer's AI presentation maker turns any prompt, outline, or PDF into a polished deck. Try it for free. No design skills or credit card needed.

AI Presentation Maker – Your next deck, drafted in minutes with Imagine Computer

Imagine Computer's AI presentation maker turns a rough idea, an outline, or an old PDF into a fully designed deck. Written, structured, and styled in one pass, so the only thing left to do is present it.

Adobe Acrobat x Adobe Express

Docs to presentations in minutes with the AI* presentation maker.

Turn ideas or existing files into polished presentations. Bring in content from Acrobat or start from scratch, then let the presentation maker generate a clear, editable draft with AI. Refine, collaborate, and share to bring your presentation over the finish line.

See Our AI PowerPoint Presentation Maker at Work

Every deck below started as a single line of text. Our AI PowerPoint presentation maker read the brief, wrote the narrative, chose a layout, and built the slides without need of any template.

Just add sample pictures here.

From Text to Slides in Three Steps

No blank canvas, no formatting rabbit holes. Describe the presentation you need, and the AI slide maker handles structure, writing, and design at the same time.

Describe or upload

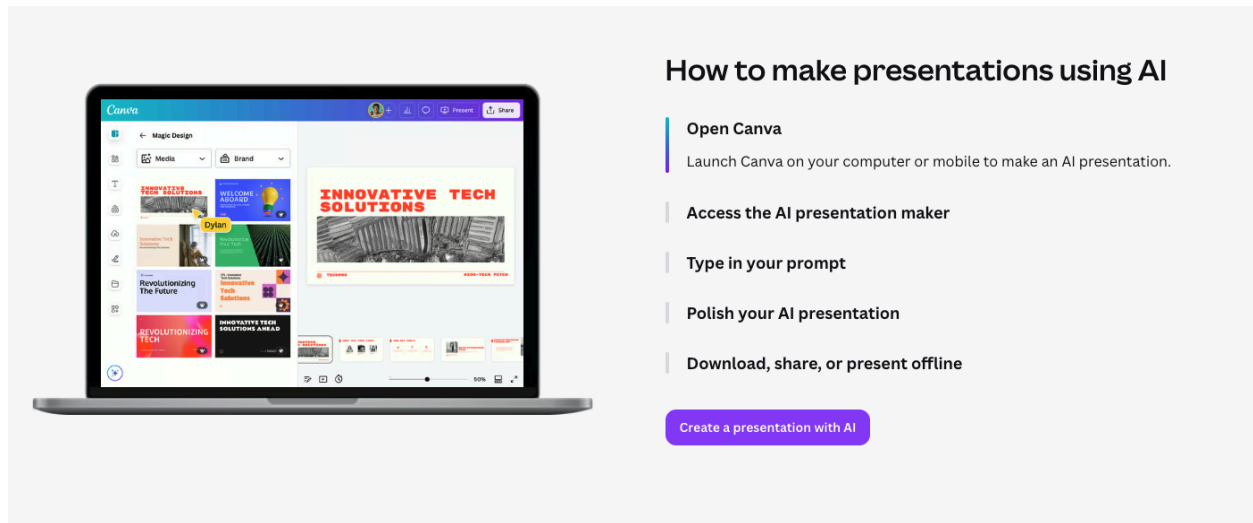

Type a topic, paste an outline, or drop in a PDF in AI Chat. You can also drop inspirations from Pinterest or choose built-in templates.

Let it generate

[Imagine Computer](#)'s AI slide maker drafts your outline, writes the slide copy, and lays out each screen in seconds.

Refine & export

Edit any slide in plain language. Ask for changes in specific sections without breaking the design. Apply your brand kit, then export to PPTX, PDF, or PNG.

Everything You Need from an AI Presentation Maker

Beyond generating slides, it's built to handle the entire lifecycle of a deck. It is built to solve every pain point you have ever had with a traditional slide maker.

Fix the structure without starting over

Feedback always lands after the first draft. A slide needs to move, a section needs to grow, a point needs cutting. Reorder, merge, or trim your outline and the whole deck reflows instantly, so a revision takes seconds instead of another afternoon.

Look consistent without policing every slide

Nobody wants a deck that looks like five different people built it, especially when it's going in front of your leadership team. Set your logo, colors, and fonts once, and every slide falls in line automatically, so the whole presentation reads as one coherent story.

Turn your notes into a deck

Your best material is usually sitting in a report, a proposal, or a one-pager nobody wants to rebuild slide by slide. Upload the PDF and get back an editable, on-brand deck in minutes. No more content search and restructuring.

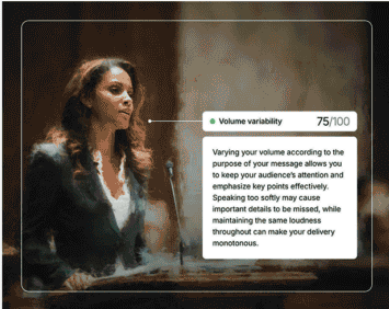

Auto-generated charts & data slides

Data only convinces someone when they can actually visualize it. Paste in your numbers and get back a slide-ready chart, styled to match the rest of your deck, so the story your data tells is clear the moment the slide loads.

VALUE PROPOSITION

Communicate with more clarity, confidence, and control

In a profession driven by words, your spoken performance defines how clients, judges, and colleagues value your expertise.

Volume variability 75/100

Varying your volume according to the purpose of your message allows you to keep your audience's attention and emphasize key points effectively. Speaking too softly may cause important details to be missed, while maintaining the same business throughout can make your delivery monotonous.

Command the room, every time

Sharpen the vocal and non-verbal habits that make your communication precise and effective.

Master vocal dynamics

Rhetoric analyzes your spoken communication and provides coaching plans to remove filler words, leverage pausing and project with confidence.

Elevate your non-verbal credibility

Get feedback on body language, eye contact and nervous habits, helping you master the art of influence.

Practice, measure, and refine

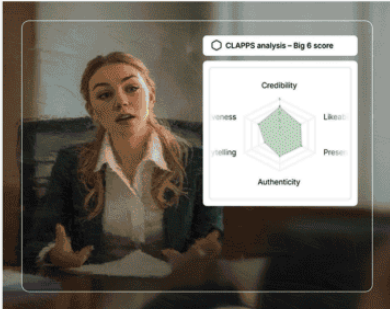

Develop persuasive communication through measurable analysis and scenario-based practice.

Move beyond subjective feedback

The Big 6, or CLAPPS, was developed by leading researchers and renowned speakers. You'll get detailed coaching on credibility, likeability, authenticity, persuasion, presence and storytelling.

Practice tailored to your practice

Use AI roleplays and run unlimited practice sessions for client consultations, high-stakes negotiations, or cross-examinations tailored to your individual and firm's needs.

CLAPPS analysis - Big 6 score

Credibility, Likeability, Persuasion, Authenticity, Presence, Clarity

Document assistant

Turn facts into unforgettable narrative

Leverage AI to structure texts and refine language that resonates

Bring Stunning Visuals in Your Slides Effortlessly

Imagine Computer's AI presentation maker is built on a full generative media engine and can create original art, diagrams, and motion for a deck.

Original imagery, generated per slide

Artwork made with an [AI art generator](#) to match your topic and tone without relying on a stock library.

On-brand diagrams and icons

Drawn with an [AI image generator](#) to fit your palette from scratch, instead of a recolored template shape.

Lightweight motion where it helps

Short and long form video for demos and product reveals generated with an [AI video generator](#) or AI motion graphics generator.

How to use Quillbot's AI presentation generator

Enter your idea

Describe your presentation idea or requirements in a sentence or two.

Generate content

Watch while Quillbot generates your presentation slides.

Edit and customize

Adjust slide text, titles, or order to match your needs.

Built for Every Team that has to Present an Idea

Whatever the room looks like, the brief is usually the same. Turn a rough idea into something worth someone's attention.

Sales

Turn call notes into a client-ready proposal before the follow-up email goes out.

Marketing

Draft campaign recaps and strategy decks without waiting on the design team.

Startups & founders

Go from a rough thesis to an investor-ready pitch deck in one sitting.

Educators

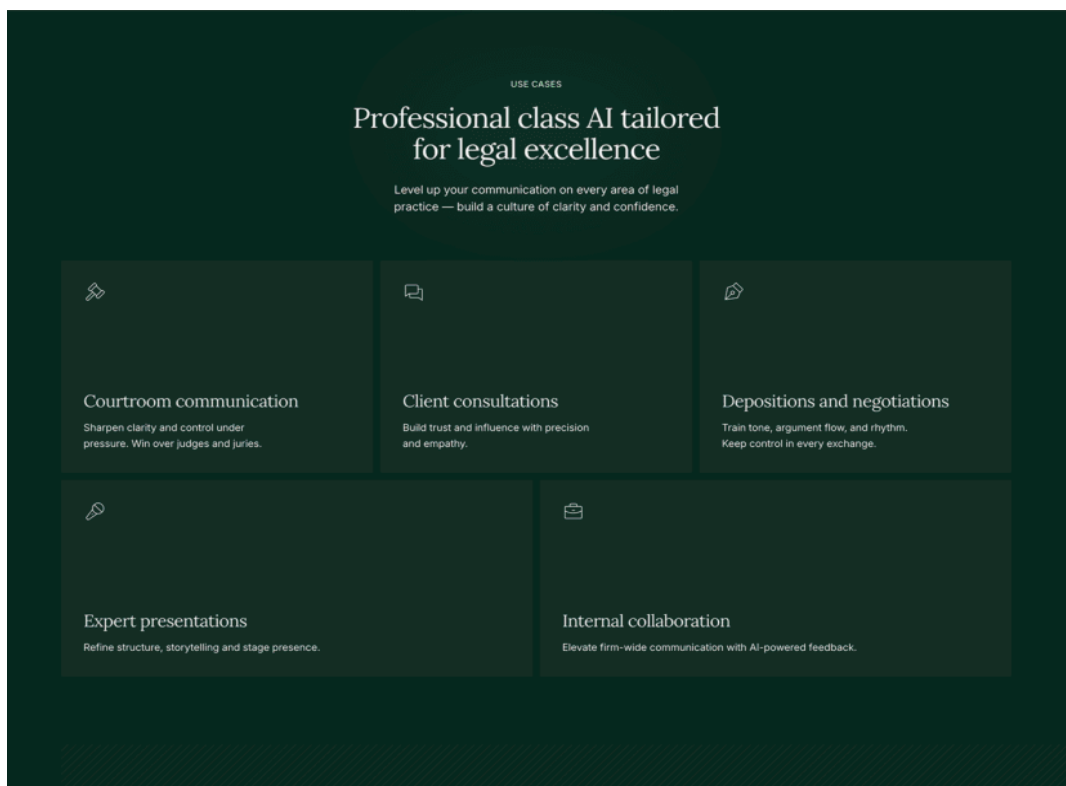

Build lesson slides and visual aids for a whole term in an afternoon.

Consultants

Turn a client workshop's raw notes into a polished readout the same day.

Operations

Keep recurring reports consistent, on-brand, and off everyone's weekend.

Loved by People Who Used to Hate Making Slides

Real feedback from teams who've swapped their slide-making routine for a five-minute draft.

- "I used to block off a whole afternoon for a client deck. Now I get a full draft before my second coffee and spend the rest of the time actually refining the story."
— Priya S., Marketing Lead
- "The PDF to PPT converter alone saved us from re-typing a 30-page research document into slides by hand."
— Marcus T., Startup Founder
- "Presenter mode from my phone means I'm not tethered to a laptop at the front of the room anymore."
— Dana K., Program Manager
- "I built a full term's worth of lesson slides in an afternoon instead of spreading it out over a whole semester of Sunday nights."
— Sam R., High School Teacher
- "Client workshops used to mean two days of turning sticky notes into a deck. Now I upload my notes and have a polished readout before the follow-up call."
— Elena V., Management Consultant
- "Every recurring report used to drift a little further from our brand each quarter. Now the template holds and I just drop in new numbers."
— Jordan K., Operations Manager

Our biggest challenge was the long turnaround times for illustrations, which disrupted workflow and caused costly delays. exactly.ai helped streamline our creative process by cutting those turnaround times significantly.

Kerby Martino
Co-founder at Incub8 Space

I tried exactly.ai for an evening and subscribed immediately. It's exactly our style, so we can upgrade the product with cohesive illustrations in seconds.

Daria Nepriakhina
Co-founder and CPO, Vendora

To make a carousel post – ten slides with an illustration – takes tens of hours of work. Now I can cut that down to a couple of hours using images generated with exactly. There are always barriers that stop businesses from upping their game. Tools like this lower and remove them.

Frequently Asked Questions

What is this tool, exactly?

It's software that uses artificial intelligence to write, structure, and design a slide deck from a prompt, outline, or document — instead of you building each slide by hand.

Is there a free AI presentation maker option?

Yes. The free plan lets you generate and export a limited number of decks, so you can try it before upgrading for higher limits and premium templates.

Can I use this as a PDF to PPT converter?

Yes. Upload a PDF and the tool reads its content, then rebuilds it as an editable, styled slide deck you can export as a PPTX file.

How is this different from other AI presentation maker tools?

Most AI presentation maker tools generate text and drop in stock visuals. This one generates original imagery, diagrams, and motion for each deck, and includes live co-editing plus phone-based presenter mode.

Does it work as an AI PowerPoint presentation maker for business decks?

Yes. It's built to handle board updates, sales pitches, and internal reports, and exports cleanly to PowerPoint's PPTX format alongside PDF and Google Slides.

Can I turn text to slides instantly?

Yes. Paste a paragraph, an outline, or even a rough set of notes, and a full draft deck is ready in under a minute.

What file formats can I export to?

PPTX, PDF, and Google Slides today, with more export formats on the way.

Is my content kept private?

Your presentations are private by default. Nothing is shared publicly unless you choose to share a link yourself.

Start with the free AI presentation maker today

Describe your topic, attach a file, or paste an outline. Your first draft just awaits a prompt.
